ECOSYS®

KYOCERA

FS-C5400DN

COLOUR PRINTER FOR A4 FORMATS

ECOSYS With their long-life components, ECOSYS devices are designed to maximise durability and minimise both direct costs such as consumables, and indirect costs such as maintenance and administration. The cartridge-free system requires that only the toner has to be replaced regularly. The modular design concept allows you to add productivity enhancing options and a wie-variety of paper handling capabilities as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

PRESCRIBE IIc
With the KYOCERA page design and control language PRESCRIBE IIc, even complex graphics, logos and forms (multipart forms) can be created on the system and stored in the printer. They can be recalled from the printer's memory as needed, reducing network congestion.

The KM NetViewer
The KM NetViewer enables complete monitoring and control of all ECOSYS printers and KYOCERA multifunction units from any Windows© PC and thus provides ideal network administration. It provides ideal network administration using the industry-standardised SNMP protocol.

Status Monitor and Command Center
The Status Monitor visually portray's the printer's condition and gives direct access to the Command Centre for the modification of advanced settings not available in the standard driver (e.g. IP settings, sleep mode or disabling the control panel).

USB Host Interface for USB Flash Memory
PDF files can be printed directly from a USB Flash Memory (e.g. USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.
