

# SMALL IS THE NEW LARGE.

Do you need colour and a wide variety of functions in A4 format? Do you have high expectations for the features of your MFP, but only a small amount of space? Would you like to save time and simplify complex workflows? If so, we recommend the innovative 300ci multifunctional system. It offers a variety of functions and the flexibility of an A3 system in the compactness of A4. In a nutshell, it's small but impressive!

A4

### HIGHLIGHTS:

**Simply simple:** The 300ci blows a breath of fresh air through your office. It prints and scans at a mind-blowing 30 and 40 A4 pages per minute. What's more, the touch display together with the innovative HypAS apps\* takes many time-consuming tasks off your hands. This way, complex workflows become simple processes. Do you perform a lot of your work on a smartphone or tablet? If so, you can use free apps like Mobile Print, Apple AirPrint and Cloud Connect to send print and scan jobs directly to the system or retrieve them there.

**Conserves resources:** Do you have to create important documents at short notice, but the toner is empty? It's a situation in which the 300ci can easily lend a helping hand, as it prints up to 30 pages in b/w – even if the colour cartridge is empty. It also helps you to save paper at the same time. Blank pages are automatically filtered out when scanning and printing thanks to the skip blank pages function. What's more, the 300ci can print small double-sided documents, such as ID cards, on the front side of a page, ensuring that you save space and resources.

**Well-equipped:** Do you need different print media? From postcards or printing index cards in A6 format right through to A4 paper weighing up to 220 g/m<sup>2</sup>? The 300ci can process them all directly from the maximum of five paper sources. You no longer need to bother with supplying or changing paper. Scanning and archiving is also very simple thanks to the standard document feeder, which automatically processes up to 75 original documents (including double-sided documents) from the batch.

**Get all of your jobs done:** Would you like to collect your print jobs neatly filed away on the system? If so, the multi tray extension\* is the perfect solution for you. It offers a further five trays, each designed for 100 pages, in addition to the main tray for 500 pages. This makes it possible to store output according to user, group or client, for example. What's more, the internal finisher\* even allows you to staple documents up to 50 pages.
