A4 COLOUR MULTIFUNCTIONALS

Ecosys ECOSYS stands for ECOlogy, ECOnomy and SYStem-printing. With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly. The modular design concept allows you to add workflow enhancing functions as required. Integrated system software provides long-term cross-network compatibility. KYOCERA's long-life components cost you and the environment less.

PRESCRIBE IIc
With PRESCRIBE IIe, Kyocera's page design and control language, even complex graphics, logos and multipart forms can be created independently on a computer and stored in the printer. They can be recalled from the printer's memory as needed, reducing network congestion.

The KM NetViewer
KM Net Viewer enables complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunctionals from any Windows© PC and thus provides ideal network administration. It also supports other devices using the SNMP protocol.

Status Monitor and Command Center
The Status Monitor shows a printer's current condition and gives direct access to the web-based Command Centre for the configuration of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode and blocking of access to the control panel).

USB Host Interface for USB Flash Memory
PDF files can be printed directly from USB Flash Memory (e.g. a USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.
